Open G4 Software

Under Setup Manager, select SLM.

Plug USB from meter into PC. Turn LxT on via power button on the front of the meter.

In G4 software, connect the meter by clicking "Connect" in the top menu. Make sure LxT is the selected device, and click "Connect."

From the G4 Meter Manager tab, you can start, stop, and pause measurements and view data files. The setup described above allows you to press Run, take your shot, and after 5 seconds, the measurement

will stop and data will be stored in a file with the LZpeak for that particular shot. Each shot is stored in its own file. From the G4 Meter Manager tab (shown below), you can start, stop, and pause measurements and view data files.
